

# Anna Konieczny

Anna Konieczny is an International Marketing Manager and Microbial Product Manager at INTERMAG.

INTERMAG, located in Poland, is one of the biggest producers of specialty fertilizers, biostimulants and bioproducts in Central Europe, and is best known from its products based on beneficial elements such as titanium, silicon and vanadium in plant available forms.

Anna graduated from University of Agriculture in Kraków and Jagiellonian University and her academic background is Horticulture and Biotechnology. Anna completed her PhD at University of Agriculture in Kraków in the field of plant nutrition. Her research interests include essential and beneficial trace elements for plants and plant interaction with symbiotic microorganisms. For around 10 years she has been studying the effect of beneficial elements on plant growth and development as well as plant health.

For several years Anna was responsible for INTERMAG business development in North, Central and South America.
