

Jose Carvalho

José Carvalho holds a PhD in Environmental Chemistry from the Humboldt University in Berlin and a Master in Pharmaceutical Sciences from Porto University, with a focus on microbiology, antibiotics resistance and immunology. Previous to joining the industry, Jose worked for the Portuguese Water Institute, the French National Institute for Agricultural Research (INRA) and the German Federal Institute for Material Science and Testing (BAM) in analytical methods, publishing 11 peer-reviewed articles and 2 book chapters. Since 2020, José is working as European Regulatory Lead for Certis Biologicals and prior to that in several regulatory and business positions within the crop protection industry. He is currently the Chair of the Microbial Professional Group at IBMA, an expert group dealing with microorganism registrability issues and market access for microorganism-based technologies in agriculture.
